

MYOB Cashbook

Designed to be efficient, flexible and simple to use, so you can spend less time at your computer and more time focusing on your business!

MYOB is one of the country's leading providers of business management software, designed specifically for New Zealand's small businesses and accounting practices.

MYOB is making business life easier, with a comprehensive range of services and products designed to help you manage your operation.

Easy GST and cash management

MYOB Cashbook is designed to be efficient, flexible and simple to use, so you can spend less time at your computer and more time focusing on your business!

MYOB Cashbook is a fully featured, user-friendly Windows program that is great for businesses that just need a basic accounting program that links with both their bank and their accountant.

Add as many separate cashbooks as you like, along with GST and cash flow reporting, import transactions directly from your Internet banking, integrated linking with your accountant (using MYOB Accountants Office).

The multi award-winning MYOB 'flowchart design' guides you at every step.

Start using it straight away – fast and simple to get started

Save money – it takes your accountant less time to import your data into their systems

Quick and easy data entry – efficient transaction entry from bank statements, cheque butts and deposit slips

No more GST headaches – GST calculations are a breeze and reporting is even easier!

Able to utilise the convenience of the Internet – links to electronic banking to help make transaction entry even quicker, allowing you to download transactions directly into your Cashbook

Simple cash flow reports – easy cash management with budget projections and historical cash flow reports that satisfy bank requirements

Integrated linking with your accountant – transfer data to your Accountant for preparation of Financial Statements.

What has changed in the new version?

The latest release of MYOB Cashbook contains a wealth of improvements and new features.

Vista Compatible – the MYOB cashbook is now compatible with the Windows Vista operating system. If you're thinking of moving to Vista now or in the future, this upgrade is a must.

Fresh New look – to take advantage of Vista we've also updated the screen interface of Cashbook with a fresh new graphical theme in the command centre.

Easier Bank Reconciliation – the bank reconciliation window has been given a significant upgrade. Users can now enter a presented date for each transaction. This can either be done when reconciling from your bank statement or if you use the "Import Transactions" function, the presented date will automatically record. We've also added a running balance column to the bank reconciliation screen. It is now very easy to isolate mistakes by simply comparing the Cashbook's running balance to the balance on your bank statement.

New and Updated Bank Import Formats – Rabobank file formats are now supported. Many other bank import formats have been updated and improved.

Better Backups – the backup procedure has been improved. Now every backup has a unique name which includes the name of the cashbook you've backed up, as well as the time. It is now much easier to tell what your backup contains and when it was made.
